AutoFix 4 Color Black Text

Post-RIP Imposition with ANY Imposition Software

Web Browser Interface for Job & Process Management

Create DataLock Files Instantly!

PrePage^{it}

As Simple as 1. 2.. 3...

AutoFix PDF Transparencies

Still one of the biggest issues facing our industry today, PDF transparency is automatically resolved and compatible so any RIP will be able to image the file to any imagesetter or CtP.

AutoFix Missing Fonts

GATF award winning technology to not only warn if a font is missing but actually emulate the required font. Font emulation maintains the beginning and end of lines ensuring that there is no text re-run.

AutoFix RGB Images

Automatically convert RGB to CMYK with pre-defined parameters to ensure the highest quality. View high resolution detail of converted images and measure color right on screen.

AutoFix 4 Color Black Text

Automatically detect and fix 4 color black text to ensure that the job will print easily without registration issues

Fix Pantone Colors

Automatically handle spot color separations - whether it is fixing the way that QuarkXpress renames Pantone colors or forcing spot colors to be separated as CMYK.

Pitstop Certified Status Check & Reporting

PreFlight and report on corrupted Fonts, Errors, PostScript Errors, PDF Errors, Low Image resolution, and a host of other issues.

Create DataLock Files Instantly

PreFlight Reporting is fine but finding potential issues and correcting them automatically is simply better. With DataLock files there are never any surprises, all of the PreFlight Fixes applied will be in the file when it is ready to go to the imagesetter or CtP - **GUARANTEED!**

Consider these options for even more functionality

View-it eProofing

Add on View-it to fully interact with customers in a real-time collaborative environment. Combine View-it with a calibrated monitor to take advantage of ICC color managed eProofs as well as a fully collaborative environment to view them in.

Send-it Job Submission

Interact with your customers 24 hours a day, 365 days a year. Create customer loyalty by providing a simple and intuitive way for them to submit jobs.
